

HASHIR ASHFAQ

Python Developer | Django & Machine Learning

+92 349 3982652 | hashiir403@gmail.com | linkedin.com/in/hashir-ashfaq | github.com/hashir403 | hashiir1.github.io/portfolio

Professional Summary

Results-driven Python Developer with **1+ years of experience** building production-grade **Django** web applications and **Machine Learning / Computer Vision** systems for real business and international clients. Proven ability to own projects end-to-end - requirements, architecture, model development, and deployment - delivering measurable outcomes such as cutting security-incident response time from minutes to seconds. Seeking a growth-focused engineering role to bring strong technical ownership and a builder's mindset to a high-performing team.

Technical Skills

Languages: Python, JavaScript, HTML5, CSS3

Frameworks & Libraries: Django, PyQt5, PyQt6, OpenCV, TensorFlow/Keras, YOLOv11, Selenium, BeautifulSoup

Tools & Platforms: Git, GitHub, Firebase, SQLite, MySQL, PythonAnywhere, Heroku, GoDaddy

Concepts: Machine Learning, Computer Vision, Web Scraping, REST APIs, OOP, Database Design

Experience

AI Soft, Faisalabad

Feb 2025 – Present

Django Web Developer & Machine Learning Engineer

- Developed and shipped full-stack **Django** web applications (e-commerce, booking, and management platforms) for real business clients.
- Built and integrated **Machine Learning** and **Computer Vision** models (CNN, YOLOv11) into production web and desktop applications.
- Designed REST-friendly backend logic, database schemas, and admin dashboards, taking features from requirements to deployment.
- Collaborated across the team to debug, optimize, and improve existing client-facing applications.

Freelance Python & Desktop Developer

2023 – 2025

Web, ML & PyQt Desktop Development

- Delivered multiple client projects including e-commerce websites, library and restaurant management systems, and booking portals.
- Built PyQt-based desktop applications with real-time computer vision (YOLOv11) for security and safety-monitoring use cases.
- Deployed and maintained projects on GitHub, PythonAnywhere, Heroku, and GoDaddy, managing the full development lifecycle independently.

Projects

Real-Time Weapon Detection & Automated Alert System

[GitHub](#)

- Built a PyQt5 desktop surveillance app using a custom-trained **YOLOv11** model to detect firearms in live CCTV feeds.
- Automated forensic evidence capture (screenshots/video) and instant email alerts to security teams, cutting response time from minutes to seconds.

AI Artisan Studio – AI Image Generation Platform

[GitHub](#)

- Built a **Django** web app that turns text prompts into high-fidelity images using a GPU-accelerated backend.
- Implemented asynchronous task queuing and cost-optimized cloud infrastructure for a production-ready, scalable experience.

Django E-Commerce with AI-Driven Sales Automation

[GitHub](#)

- Developed a full-featured **Django** e-commerce platform with secure checkout, guest browsing, and WhatsApp inquiry integration.
- Integrated an **AI chatbot** for buyer assistance and automated email order confirmations to streamline the sales pipeline.

Full-Stack Limousine Booking & Client Management Portal

[Live Website](#)

- Built a responsive **Django** booking platform for a US-based luxury limousine service, replacing manual phone/email booking.
- Implemented dynamic quotes, secure document verification, and multi-step booking forms for a seamless client journey.

Education

Virtual University of Pakistan

2022 – 2026

BS Information Technology

Aspire Group of Colleges, Toba Tek Singh

2020 – 2022

F.Sc. Pre-Medical

Activities

- External Supervisor, Superior University** – Evaluated student projects and mentored students on industry best practices.
- Job Fair Participant, RICHMIND Faisalabad** – Represented AI Soft, engaging candidates on tech career opportunities.
